<b>Summary of the content of the academic discipline:</b>	
<p>The aim of the discipline is to provide students with a system of knowledge about the regularities of human mental development in ontogenesis, conditions and factors of development of mental processes and personality traits of a child at different age stages. Special attention is paid to the psychological peculiarities of the age-related development of the child and the child's upbringing and learning at different stages of ontogenesis. The issues of pedagogical psychology are considered taking into account the peculiarities of the specialty acquired by students and will contribute to the formation of the specialist's readiness to solve applied problems in professional activity, the development of the need for professional and personal growth and the strengthening of professional health.</p>
