Brief content of the academic discipline:

The relevance of the discipline "Fundamentals of psychology and pedagogy" is due to the need to study on the basis of interdisciplinary approach such complex phenomena as developing personality and education in the new socio-cultural conditions.

This approach will contribute to the construction of a generalized picture of the studied phenomena, a deeper understanding of them, the identification of relationships and influence, which will be the basis for further effective study of students of psychological and pedagogical disciplines and passing all kinds of practice.

The main integrating ideas of the discipline are the phenomena of the developing personality as the highest value in the modern world of technology and education as the main mechanism of development of the individual and society as a whole. These complex and multifaceted phenomena will be examined from the perspective of psychology and pedagogy in interdisciplinary, historical and contemporary contexts.
