

**The name of the academic discipline:
«Histology with the basics of embryology»**

Code and name of specialty	1-02 04 01 Biology and Chemistry
Training course	1
Semester of training	2
Number of class hours:	54
Lectures	14
Seminar classes	-
Practical classes	12
Laboratory classes	28
Form of current assessment (credit/differential credit/exam)	credit
Number of credits	3
Competencies to be formed	Mastering the discipline "Histology with the basics of embryology" should ensure the formation of specialized competencies: apply knowledge about the development of vertebrates, the structure and sources of origin of various tissues to form ideas about the development and functional purpose of human and animal tissues.

Summary of the academic discipline:

The academic discipline "Histology with the Basics of Embryology" forms the knowledge of the scientific and materialistic idea of the development and structural organization of living matter, the unity of structure and function, the general and specific features of the development of various representatives of vertebrates.
