

**Academic discipline:
«Sound production practice»**

Code and name of specialty	1-03 03 01 Logopaedics
Training course	1
Semester of training	1
Number of class hours:	40
Lectures	14
Seminar classes	-
Practical classes	22
Laboratory classes	4
Form of current assessment (credit/differential credit/exam)	credit
Number of credits	2
Competencies to be formed	To design the learning process, set learning goals, select learning content, methods and technology based on a system of knowledge of pedagogical theory and methodology. Select content, forms, methods and tools for the inclusion of learners with special educational needs in the educational process and interaction with their peers. To design the educational process with students with special educational needs on the basis of medical-biological, psychological, linguistic knowledge and skills.

Brief content of the academic discipline:

In the process of studying the compulsory module " Sound production practice" students develop ideas about the pronunciation side of speech and the acoustic basis of sound formation, the ability to characterize the sounds of the Russian language, taking into account the anatomical and physiological characteristics of their formation, the ability to plan and conduct work on the formation of sound production, as well as the ability to competently conduct the development and correction of articulation motor skills of children with speech disorders using various exercises and types of articulation. Students study the neurological and anatomical-physiological basis of articulation motor skills and the structure of the speech apparatus.
