<b>Code and name of specialty</b>	1-03 03 01 Logopaedics
<b>Training course</b>	1
<b>Semester of training</b>	2
<b>Number of class hours:</b>	50
<b>Lectures</b>	22
<b>Seminar classes</b>	
<b>Practical classes</b>	28
<b>Laboratory classes</b>	
<b>Form of current assessment (credit/differential credit/exam)</b>	credit
<b>Number of credits</b>	3
<b>Competencies to be formed</b>	To carry out professional activity in the conditions of updating its goals, content, changing technologies, to determine methods of solving professional tasks, to evaluate their effectiveness and quality.

**Brief content of the academic discipline:**

The structure of the discipline "Theoretical and methodological fundamentals of speech therapy" is presented by the following sections: "Speech therapy as a science", "Etiology of speech disorders", "Classification of speech disorders", "Principles and methods of speech therapy examination and impact".

The first section allows students to get acquainted with the main stages of development of speech therapy as a science, with the basic conceptual and categorical apparatus, the basic terminology. The second section includes a study of the historical aspect of the problem of speech disorders. The third section considers different approaches to the classification of speech disorders and the types of speech disorders highlighted in the clinical and pedagogical classification and in the psychological and pedagogical classification. The fourth section considers the principles of examination of persons with speech disorders and the principles underlying speech therapy, the main forms and methods of speech therapy.
