Brief content of the academic discipline:

The purpose of this course is to provide a highly qualified speech therapist with knowledge about age-specific features of the human psyche and the regularities of its functioning and development. Special attention is paid to the psychological features of age development, upbringing and learning at different stages of ontogenesis. The psychology of upbringing and psychology of a teacher are considered taking into account the specifics of the specialty "Speech therapy" acquired by students. All of these will contribute to the successful solution of applied problems, the development of students' professional attitude and ability to analyse facts and research results in the field of age and pedagogical psychology.
