<b>Summary of the content of the academic discipline:</b>	
The academic discipline "Sociology of education" aims at developing students' skills in a qualified sociological analysis of educational processes. In this regard, it includes a wide range of information on the history and methodology of education; an overview of approaches to the interpretation of education; the history of the formation of the subject and methodological field of sociology of education as an independent scientific discipline; an exposition of the main categories of theoretical and empirical sociology of education. The study of the discipline allows students to form theoretical ideas and practical skills in the field of sociological research of education, to obtain systematic knowledge about the essence, characteristics and functions of education as a social phenomenon, as well as to master the methods of sociological study of education.
