

**Academic discipline:
"Programming in information systems"**

Code and name of specialty	1-25 01 12 Economic informatics
Training course	3
Semester of training	5
Number of class hours:	68
Lectures	34
Seminar classes	-
Practical exercises	-
Laboratory classes	34
Form of intermediate assessment (credit/differential credit/exam)	credit
Number of credits	3
Competencies to be formed	To develop software modules in the built-in programming language of the 1C information system: Company

Summary of the content of the academic discipline:

The course "Programming in information systems" is focused on the formation of basic knowledge and programming skills in the embedded language of the 1C platform: Company. The course introduces the basic principles of creating application solutions based on this platform related to solving economic problems facing a particular organization, as well as preparing for the use and refinement of mass-produced application solutions produced by 1C.
