Academic discipline:
"User Interface development"

Code and name of specialty	1 – 40 01 01 Information technology software
Training course	3
Semester of training	5
Number of class hours	52
Lectures	32
Seminar classes	-
Practical classes	-
Laboratory classes	20
Form of current assessment (credit/differential credit/exam)	Credit
Number of credits	3
Competencies to be formed	To possess modern technologies for designing complex systems and software tools; to be able to use automated software development tools
Summary of the content of the academic discipline:	
The course "User Interface development" involves the training of systematic knowledge of modern methods of forming and programming user interfaces, a certain level of technical training in the basics of programming on the client side of applications and the necessary skills for forming and programming user interfaces. The acquired knowledge will allow students to create effective and in-demand applications with a developed user interface.
