

Academic discipline:
"Internal diseases"

Code and name of specialty	1-80 02 01 Biomedical science
Training course	3
Semester of training	6
Number of class hours:	176
Lectures	70
Seminar classes	-
Practical classes	38
Laboratory classes	68
Form of current assessment (credit/differential credit/exam)	Exam
Number of credits	9
Competencies to be formed	To be able to use the principles of hormone functioning, basic theoretical concepts and principles in the field of hormonal regulation mechanisms. To be able to use knowledge about the immune system of the human body, its regulation when exposed to the external environment in normal and pathological processes, the main methods of immunodiagnostics. To be able to apply knowledge about the main risk factors, clinical symptoms and syndromes of the most common diseases of internal organs, and the mechanisms of their occurrence
<p style="text-align: center;">Summary of the content of the academic discipline:</p> <p>Theoretical issues that are considered in the process of studying the discipline "Internal diseases" allow students to master the basics of fundamental knowledge and practical skills in the field of physiology, anatomy, medicine. The study of the discipline "Internal diseases" is closely related to the study of such subjects as "Normal physiology", "Normal anatomy", "Biochemistry", "Histology", "Pathological physiology", "Pathological anatomy", "Endocrinology".</p>
